Description

Manufacturer: Rus Bio Pharma
Pack: 10 ml / (250 mg/ml)

Substance: Nandrolone Decanoate

What is Nandrolone? | What is Nandrolone Decanoate Rus Bio? | What is Deca? | Nandrolone Decanoate Rus Bio?

Nandrolone Decanoate Rus Bio is the brand name of a **Rus Bio** steroid product which is having the active substance **Nandrolone Decanoate** or as many people know it – **Deca Durabolin** or simply **Deca**. This is one of the most famous and most used form of injectable steroids in the world for physique and performance enhancement purposes.

In fact, **Nandrolone** esters are considered to be the absolutely most widely utilized AAS for such purposes by bodybuilders, athletes and powerlifters nowadays and historically.

Nandrolone Decanoate Rus is the long based ester which is offering a very delayed release of **Nandrolone** in the system after it got administered. The half life of **Nandrolone Decanoate** which might be better known as **Deca Durabolin** or simply **Deca** (as the brand name **Nandrorox D** here) is approximately 14 days or so.

This compound is the most used steroid for bulking up among injectable steroids and is the second most widely used steroid among all steroids losing only to **Dianabol (Methandrostenolone or Methandienone)** which is an oral steroid.

Nandrolone is also known to come with **Phenylpropionate** ester that is offering a faster release and therefore a shorter half life of only about 4-5 days. **Nandrolone Phenylpropionate** is better known as **Durabolin** or **NPP**. Do not confuse the 2 steroids.

This steroid is mainly used in the treatment of anemias as well as wasting syndromes but is extremely effective for enhancing performance and physique. It has an anabolic rating of 125 and androgenic 37, but make sure you are aware of its detection time which is extremely long – 17-18 months.

This compound was firstly discovered back in 1960s and is widely used nowadays in both medical settings and for physique enhancement purposes nowadays too. This product is among the best known steroids in the history of bodybuilding industry because is a powerful steroid which can be extremely effective and safe in terms of side effects mainly due to low androgenic activity.

How Nandrolone Decanoate Works? | What Does Deca Durabolin Do? | Nandrorox D Uses

Nandrolone Decanoate with the brand name **Deca Durabolin** or simply **Deca** sold as **Nandrolone Decanoate Rus** is working the exact same way as any other given steroid by binding to the androgen receptor. By doing so, it has shown to increase the muscle mass in those using it with a lot of success and this is the reason why the compound is very widely used for this purpose – for bulking purposes.

Make sure you know that **Nandrolone Decanoate** – **Deca** is a wet bulking steroid and that's because users are retaining a lot of water while using the compound. Also, make sure you know that the full effects of **Deca** start to be shown after about a month of being on the cycle because of its extremely long half life.

This compound is mainly used by steroid users because is an extremely effective stuff for growing muscle mass and size and increasing strength. In the time that the user is training hard, this compound is perfect. Both because of the reasons mentioned, and because this is one of the best products out there for joint health and for recovery process.

While individual is lifting heavy weights, this compound would keep your joints and tendons very healthy, also would offer a faster and more efficient recovery all with great benefits for performance enhancement.

This compound is not very suitable for cutting due to the water mass but is perfect for bulking. Also is a product with various medical uses too. In the end, if you want an amazing steroid for bulking – **Deca** – **Nandrolone Decanoate Rus** is definitely what you need.

How to Use Nandrolone Decanoate? | Deca Durabolin Cycle | Nandrorox D Dosage

Nandrolone Decanoate Rus is coming in an oil based solution and is used intramuscularly for a very long period of time for getting the maximum out of it. The steroid is used, as mentioned, during the time you need to bulk up and get huge and is used much less frequent than other steroids due to its long half life.

Also, due to the fact that is very aromatizable which can offer estrogen related side effects, [Deca Durabolin](#) or **Deca** – **Nandrolone Decanoate Rus** containing **Nandrolone Decanoate** is always used alongside with some aromatase inhibitor.

Cycle length with **Deca** is no less than 12 weeks, but some people go as high as 16 weeks cycle length or more. Due to the half life of 14-15 days, it is safe to say that using it once a week – that would be enough.

Very often, this compound is stacked with other wet steroids and most often with long based Testosterones such as **Cypionate** or **Enanthate**.

Dosages of **Nandrolone Decanoate** fall in the range of 300 up to 800 mg a week, while 400 – 500 mg per week is what most people prefer.

You can try 14 weeks with **Deca** 400 mg a week alongside with long based testosterone 500 mg a week with some aromatase inhibitors and might need some orals for kick start your cycle.

Nandrolone Decanoate Side Effects | Deca Side Effects | Nandrorox D

Nandrolone Decanoate is by far not such a bad steroid in terms of side effects as many people tend to think about it. In fact, this compound got so famous and widely used due to a very high ratio of benefits vs side effects.

However, side effects are definitely possible if abusing this product and not using it properly. Despite the fact that side effects are by far not as bad as with **Trenbolone**, make sure to use the steroid properly.

The worst side effects of **Nandrolone Decanoate** – **Deca** are related with estrogen and that's because the compound is very aromatizable. This is the reason why aromatase inhibitors are needed for avoiding water retention, gynecomastia and others.

However, this compound is also notorious for offering a side effect manifesting in inability to maintain or reach an erection. Men's pills are used to deal with this side effects.

Virilization for women and natural **testosterone** suppression are both very possible with this compound too.
