

# Oxandrolone (Anavar) 10 mg Rus Bio / 100 tabs

## Description

Manufacturer: Rus Bio Pharma

**Pack: 100 tabs / (10 mg/tab)**  
**Substance: Oxandrolone**

## **What is Oxandrolone Rus Bio ? | What is Anavar?**

**Oxandrolone Rus Bio** is the active substance in the better known (more famous) product with brand name called **Anavar**. **Anavar** is the brand name containing **Oxandrolone** as active substance. But **Oxandrolone** by **Rus Bio** is both the trade name and the active substance and the big advantage over **Anavar** is that **Oxandrolone** manufactured by **Rus Bio** is a lot much cheaper while maintaining the same high quality, clean, sterile and pure product.

**Oxandrolone Rus Bio** is an **anabolic and androgenic steroid (AAS)** that is coming in form of tablets which means that it is designed for oral use. This is one of a kind steroid very high level of anabolic activity and very low level of androgenic activity. That's why the product is capable to offer huge muscle mass gains with milder and minimal side effects.

This product is used to offer weight gains, help fight off with protein catabolism, treat bone pain associated with osteoporosis and it has a number of other uses. With all of this being said, is no wonder the product got extremely popular in bodybuilding industry.

**Oxandrolone Rus Bio** has been proved to be extremely beneficial for improving physique and performance. The product is mainly used in cutting cycles, but it is not unheard of people adding it during bulking phases too.

Because the product is considered mild in terms of side effects and very effective, **Anavar** (or shortly named **Var**) – **Oxandrolone Rus Bio**, is extremely popular among women. In fact, this is one of the most popular **steroids** for women.

**Oxandrolone Rus Bio** is a **DHT** derived oral anabolic **steroid** that despite the fact that is a mild **steroid**, is very effective and can offer very big results. This is one of the main reason why the product is preferred by **steroid** beginners, women and still used by **steroid** veterans making it an overall extremely popular product.

## **What Does Anavar Do? | What is Oxandrolone Rus Bio Used For? | How Does Oxandrolone Rus Bio Work?**

**Anavar – Oxandrolone Rus Bio** is used in medical settings for many various needs. It can help to offer weight gain in various needs, it can support the recovery from severe burns, help with osteoporosis (treating bone pain associated with this condition), help protein catabolism that is caused by long term corticosteroid therapy, help with development of girls with Turner syndrome and many other uses.

But the product is also very and very popular for bodybuilders. It is used for improving physique and performance and most often in cutting cycles. However, females can find it extremely beneficial for bulking cycles either.

Although is an oral **steroid**, is still having low **hepatotoxicity** (compared to other oral **steroids** out there) and that's why many people resort to this **steroid** for improving their physique and performance.

This **steroid** is greatly helping to burn fat, to increase the level of **Human Growth Hormone (HGH)** in the body, to increase strength as well as endurance as well as to gain new muscle mass in the time that you won't get any water retention in the body.

All in all **Oxandrolone Rus Bio** is going to make sure that the muscle mass would be protected and it would also help with a much faster fat loss by increasing the metabolism and Lipolysis. In the end, you are going to get much more toned, stronger as well as would get a much more defined physical appearance.

## **Oxandrolone Rus Bio Dosage | Anavar Rus Bio Cycle | Anavar Rus Bio Dosage | How to Take Anavar Rus Bio?**

**Anavar – Oxandrolone Rus Bio** should be taken orally as it comes in forms of tablets. The dosages can be different depending on what exactly you are looking for, personal tolerance, male/ female and a number of other factors.

Because of a fairly short half life which is only 10 hours (but is estimated to be effective for only 5 hours) it is recommended to split the dosage up in 2 even halves per day. For example, if you're using 50 mg a day then it would be better to use 25 mg the first thing in the morning and 25 mg before training.

Half life is 10 hours, but the detection time is up to 3 – 4 weeks, remember this if you're planning to have some tests done.

Dosages are anywhere in the range of 25 mg to 100 mg a day while most people would find their sweet point is 50 mg a day. Running less than 50 mg a day might not be effective but using more than 50 mg is only recommended by professionals and more advanced people.

**Anavar** Rus Bio can be used alone. Usually, people use 50 mg (25 mg in the morning – 25 mg pre training) a day for a total of 6 weeks. Training and dieting in this time would provide a few lbs of lean muscle mass while losing body fat.

It can be used alongside with **testosterone** enanthate (500 mg a week for 14 weeks). Or it can be used with **testosterone cypionate** for 8 weeks (both products).

In both situations add **cardarine** 20 mg a day, **aromasin** 10 mg a day and 7 caps a day of **N2Guard**. Add **Post Cycle Therapy** as is very important!

Women's cycles and dosages are very different: recommended dose is 5 to 20 mg a day with a cycle excluding **aromasin** and **testosterone**.

## Oxandrolone Rus Bio Side Effects

The big advantage of **Oxandrolone Rus Bio** is that it is much more side effects milder compared to other **steroids**.

This product does not offer **estrogenic** side effects as it cannot convert to **estrogens**, it has very low **androgenic** side effects profile meaning that **virilizing** side effects and others in this matter are usually appearing only when used in too high doses.

In addition to that, **hepatotoxic** side effects are very rarely noticed although the product does elevated liver enzymes. Just to stay on the safe side – don't abuse it or use it for prolonged time.

Although a mild **steroid** it must be respected and used properly, otherwise the side effects are guaranteed. It can affect lipids (negative effect on **cholesterol**), can **suppress natural testosterone** and offer hair loss too.
